SUMMARY

Full-stack software engineer with 3+ years shipping production web applications in banking and e-commerce, working across TypeScript, React, Java/Spring Boot, PHP, and AWS. Also builds and ships side products end-to-end — four live applications on React, Node.js, Supabase, and LLM APIs, with source on GitHub.

EXPERIENCE

Software Engineer, Technology Development Program — PNC Bank

Strongsville, OH · February 2026 – Present

- Selected for PNC's Technology Development Program, rotating through engineering teams that build and operate distributed banking systems used by millions of customers.
- Designed and shipped an internal web application now used by multiple teams across the organization, owning the work end-to-end from interface through API integration.
- Deliver frontend features across React, Angular, Vue, and Next.js codebases, adapting to each team's stack and conventions through rotations.
- Build and integrate backend services in Java and Spring Boot within a regulated environment's code review, testing, and CI/CD requirements.

Founder & Creative Director — Foundry Frame LLC

Lorain, OH · April 2026 – Present

- Founded and operate a web design and development studio, delivering React, Next.js, and TypeScript sites for small-business clients on Node.js and Vercel infrastructure.
- Own the full delivery cycle — scoping, architecture, build, deployment, hosting, and maintenance — sustaining a 90% client retention rate.

Web Developer — American Marketing Association

Chicago, IL · October 2022 – October 2025 · Role eliminated in company-wide layoff

- Built and maintained the membership and e-commerce platform for a national marketing organization across PHP, WordPress, WooCommerce, and MySQL.
- Engineered member-facing features and checkout functionality on a platform serving thousands of members, contributing to a 25% increase in revenue.
- Integrated third-party payment, membership, and marketing APIs using PHP, JavaScript, and TypeScript.
- Deployed and maintained AWS infrastructure supporting the platform's web applications, APIs, and services.

PROJECTS

Syllaplan · React · TypeScript · Node.js · Supabase · Claude API · syllaplan.com · [source](#)

- Built an AI syllabus parser that extracts exam dates and assignment deadlines from uploaded PDFs via the Claude API, handling inconsistent formatting across schools and course types.
- Designed a human-in-the-loop confirmation step so extracted dates surface for review and editing before writing to a calendar, trading blind automation for accuracy.

Kanban Flo · React · TypeScript · Node.js · Supabase · AWS · kanbanflo.com · [source](#)

- Built a kanban task manager with drag-and-drop boards, due-date reminders, and team collaboration in React and TypeScript, plus AI-assisted prioritization and natural-language task entry.
- Deployed on AWS using serverless architecture to scale on demand without dedicated infrastructure overhead.

PrereqPilot · React · TypeScript · Node.js · Supabase · AWS · prereqpilot.com · [source](#)

- Built a course-planning tool that models university prerequisite chains and generates valid, optimized degree paths from a student's completed coursework across multiple university catalogs.

Scrivelyr · React · TypeScript · Node.js · Supabase · AWS · scrivelyr.com · [source](#)

- Built an AI writing assistant providing grammar and style suggestions, originality checks, and real-time feedback, using LLM APIs for sentence restructuring and vocabulary recommendations.

SKILLS

Languages: TypeScript, JavaScript, Java, PHP, Python, C#, SQL, HTML/CSS

Frontend: React, Next.js, Angular, Vue, SASS/SCSS, responsive UI

Backend & Data: Node.js, Spring Boot, Laravel, ASP.NET, REST APIs, microservices, PostgreSQL, MySQL, Supabase

Cloud & Tooling: AWS (serverless, hosting), Vercel, CI/CD, Git, GitHub, Bitbucket, Linux/Unix

AI & Practices: Claude API, OpenAI API, LLM integration, GitHub Copilot; Agile/Scrum, code review, testing, system design

Infrastructure: Docker, Kubernetes, Terraform, Kafka, Redis

EDUCATION

M.S., Information Technology — Western Governors University · Expected 2027

A.A.B., Programming & Development — Cuyahoga Community College · 2026

B.S., Psychology — Western Governors University · 2025
